

Where Education Meets FUN!

COVID-Safe Excursions

In addition to excursion rules already in place, school students and representatives must adhere to the following regulations when visiting the Australian Reptile Park for a school excursion. By visiting the Australian Reptile Park for an excursion, the school and its representatives are agreeing to the following:

- Schools visiting the Australian Reptile Park for a school excursion must have their own COVID-Safe plan in place. It is the school representative/teacher's responsibility to follow these procedures for out of school excursions.
- The head teacher in charge of the excursion must sign-in to Service NSW upon arrival. They will be the contact for the group for any contact tracing if necessary.
- Student/adult ratios must be strictly adhered to. For every so many children, an adult is allowed in free, the ratios are as follows:
 - Preschool & Kindergarten – 1:5 (1 adult for every 5 children)
 - Years 1-6 – 1:8 (1 adult for every 8 children)
- Whilst on-site at ARP, school students and adults must remain within their own groups and must not interact with groups from other schools.
- When visiting indoor areas at the Australian Reptile Park, indoor capacity limits must be adhered to, as per signage and as indicated on the Park Map.

SCHOOL SHOWS:

- Upon arrival at ARP, staff member conducting the show will have a temperature check performed (must be cleared with a temperature less than 37.5oC) and sign-in on staff sheet (as do all staff on-site).
- For interactive portions of presentation, students must hand-sanitise (sanitiser provided) before they touch each animal.
- ARP staff must socially distance themselves from each other and students as much as possible during presentation.
